

# 2018 SUMMARY REPORT

## Commercial Feed Inspections

*PLANT INDUSTRIES DIVISION*

*BUREAU OF FEED, SEED AND TREATED TIMBER*

# **Missouri Department of Agriculture Mission Statement**

---

**To serve, promote, and protect the agricultural producers,  
processors, and consumers of Missouri's food, fuel, and fiber  
products.**

## **Bureau of Feed, Seed and Treated Timber 2018 Program Review**

The Missouri Department of Agriculture (MDA) Plant Industries Division, Bureau of Feed, Seed and Treated Timber assists the state's feed industry and consumers through inspecting and testing product and providing information to consumers to assist in making buying decisions. The Summary Report of 2018 Commercial Feed Inspections includes data from over 1,400 inspections and over 38,000 laboratory tests. This report is provided as an annual review of the bureau's responsibilities and accomplishments and as reference material.

Recognition that livestock feed is a key component in food safety is expanding; therefore, the focus on feed safety continued in 2018. The Missouri Department of Agriculture's Bureau of Feed, Seed and Treated Timber, in cooperation with FDA, plays an important role in food safety by providing inspection and surveillance for Bovine Spongiform Encephalopathy (BSE) prevention and Good Manufacturing Practices (GMP) inspections. Bureau inspectors are trained extensively and hold FDA credentials to carry out surveillance inspections. These inspections ensure animal feed is safe which in turn helps protect the safety of the food supply for human consumption.

In 2018, the bureau performed 30 BSE inspections. Staff inspected Missouri feed facilities to review the practices of manufacturers and/or distributors of feed products containing prohibited mammalian protein in compliance with Federal Rule 21 CFR Part 589. These inspections are designed to make sure no prohibited protein is fed to ruminant animals.

Twelve GMP inspections of federally licensed medicated feed manufacturing establishments were performed by MDA staff in 2018. An additional 53 inspections were conducted at medicated feed production plants not licensed by FDA. Those inspections are a vital part of the food safety initiative for all animal feed. The program is intended to ensure legally approved levels and combinations of drugs and antibiotics are used in feed products and that each facility's housekeeping, records, labeling, cleanliness and other practices are in compliance with 21 CFR Part 225. In 2018 MDA staff performed 22 GMP inspections under new rules (21 CFR Part 507) as part of the phased implementation of the Food Safety Modernization Act.

Food safety is also addressed in the bureau's annual survey of corn produced in the state. In addition to providing test information to manufacturers for crude protein levels, the bureau tests for aflatoxin, fumonisin, vomitoxin and zearalenone. If corn is found containing toxin levels exceeding FDA guidelines for safe use for livestock, notifications are sent immediately to the facility at which the corn was sampled.

The Bureau of Feed, Seed and Treated Timber inspectors responded swiftly to nine complaints in 2018 about the quality or safety of feed or feed ingredients. When problems required testing beyond the scope of the feed program or the capabilities of the Missouri Feed Control Laboratory, other agencies were utilized or samples were sent to other laboratories for testing.

The Bureau of Feed, Seed and Treated Timber cooperated with the Plant Pest Program and the USDA to obtain samples from Missouri's 2018 wheat production. All samples collected tested negative for karnal bunt wheat disease. The assurance provided by this testing allows Missouri wheat to be exported to many countries that require the testing.

The Bureau of Feed, Seed and Treated Timber took regulatory action against unlicensed companies or those who failed to file tonnage reports. Those actions are reported in "Violations Other Than Failure to Meet Label Claims."

In 2018, inspectors collected 4,584 samples of finished feeds and feed ingredients. The collected samples were tested for adherence to label guarantees, resulting in 33,444 individual assays in 2018. If testing revealed a deficiency or excess from the guaranteed analysis or something of a detrimental nature, a Withdrawal from Distribution Order was issued immediately. There were 501 withdrawals issued in 2018, for a statewide compliance rate of 88.15%. A total of 333 service and complaint samples were analyzed in 2018.

The Missouri Feed Control Laboratory analyzed 10 customer-formula samples in 2018. Customer-formula feeds are those for which the customer has designed his own ration and asks for specific ingredients in specific quantities to be blended by the manufacturer. Each customer requesting the feed, as well as the manufacturer of the feed, received an analytical report showing nutrient levels found in the sample. In addition, customers received a questionnaire to confirm they received the quality of feed requested.

The Excellence in Compliance Award Program recognizes feed companies who have achieved at least 90% adherence to label guarantees on five or more samples. The companies must also be up-to-date with all fees and reporting. One hundred companies qualified for that award in 2018. Sixty-eight of those are located in Missouri.

In 2013, the Animal Feed Regulatory Program Standards (AFRPS) were established by the Food and Drug Administration (FDA) in cooperation with the Association of American Feed Control Officials (AAFCO) to provide a framework that every state can use to determine the strengths and needs of its program. Implementation of these standards will build uniformity and consistency among state feed regulatory programs and further efforts to develop an integrated food safety system.

In August 2014, Missouri Department of Agriculture became 1 of 12 states to enroll in the AFRPS, and in September 2015, the department was the recipient of a grant that has assisted the Bureau's Feed Inspection Program in implementing the 11 standards. This year, an audit performed by FDA revealed that the Missouri Feed Program has successfully implemented 8 of the 11 standards. In conjunction with the same FDA grant, the Missouri Feed Control Laboratory has put plans in place to become ISO/IEC 17025 certified and will expand its testing capability to test for microbiological pathogens and toxic agents that pose threats to the animal and human food supply. These improvements will increase inspectional and laboratory capability, resulting in improved safety of the food supply in Missouri and will contribute significantly to an integrated food safety system.

In 2018, the Missouri Feed Regulatory Program and Feed Control Laboratory made significant progress toward its goals of full implementation of the AFRPS and attaining ISO 17025 Accreditation. By implementing AFRPS, the Missouri Department of Agriculture works to achieve its mission: "To serve, promote, and protect our agricultural producers, processors and consumers of Missouri's food, fuel and fiber products".

## U.S. Food and Drug Administration Guidelines for Aflatoxin Levels

Corn containing less than 20 parts per billion aflatoxin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn exceeding 20 ppb can be fed only for specific age, weight, and production stage. Corn exceeding 300 ppb must be blended with corn containing little or no aflatoxin before feeding is allowed to specific age, weight, and production stage of livestock. Before corn can be blended for out-of-state shipment, the U.S. Food and Drug Administration must be notified and permission obtained from the Missouri Department of Agriculture for this to be allowed.

U.S. Food and Drug Administration guidelines are as follows:

Aflatoxin Level (in parts per billion)	Class of Animal	Commodities
20 ppb	Dairy animals, animals not listed below, or unknown use	For corn, peanut products, cottonseed meal and other animal feeds and feed ingredients
20 ppb	Immature animals	For corn, peanut products and other animal feeds and feed ingredients, but excluding cottonseed meal
20 ppb	Pets (dogs, cats, rabbits, etc.) of all ages	For corn, peanut products, cottonseed meal, and other food ingredients and complete pet food
100 ppb	Breeding cattle, breeding swine, and mature poultry (e.g. laying hens)	For corn and peanut products
200 ppb	Finishing swine (100 pounds or more)	For corn and peanut products
300 ppb	Beef cattle, swine, poultry (Regardless of age or breeding status).	For cottonseed meal
300 ppb	Finishing beef cattle (e.g. feedlot cattle)	For corn and peanut products

## U.S. Food and Drug Administration Guidelines for Fumonisin Levels

Corn and corn by-products containing less than 5 parts per million fumonisin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn and corn by-products exceeding 5 ppm can be fed only for specific species, age, and production stage. The recommended maximum levels for fumonisins in animal feeds that FDA considers achievable with the use of good agricultural and good manufacturing practices are presented below. FDA believes that controlling fumonisins to these recommended levels can reduce exposure to fumonisins that may be found in corn products intended for animal consumption.

Class of Animal	Commodities & Portion of Diet	Levels in Corn & Corn By-products (in parts per million)	Levels in Finished Feeds (in parts per million)
Equids and rabbits	For corn and corn by-products not to exceed 20% of diet **	5 ppm	1 ppm
Swine and catfish	For corn and corn by-products not to exceed 50% of diet **	20 ppm	10 ppm
Breeding ruminants, breeding poultry and breeding mink*	For corn and corn by-products not to exceed 50% of diet **	30 ppm	15 ppm
Ruminants < 3 months old being raised for slaughter and mink being raised for pelt production	For corn and corn by-products not to exceed 50% of diet **	60 ppm	30 ppm
Poultry being raised for slaughter	For corn and corn by-products not to exceed 50% of diet **	100 ppm	50 ppm
All other species or classes of livestock and pet animals	For corn and corn by-products not to exceed 50% of diet **	10 ppm	5 ppm

\*Includes lactating dairy cattle and hens laying eggs for human consumption

\*\*Dry weight basis

## 2018 Corn Survey

The Missouri Department of Agriculture is happy again to report the results on our annual monitoring of aflatoxin in corn. This survey has been reported yearly since 1993. We also analyze all customer complaint samples for aflatoxin when symptoms suggest adulteration. Laboratory tests are conducted to determine the average crude protein in corn. In 2018, the average crude protein for corn was 8.28%, higher than 7.68% in 2017's corn crop. Each sample was adjusted to a 13.5% moisture level.

Samples of corn are drawn from counties having an expected production of greater than 1.5 million bushels, with one sample added for each additional two million bushels produced. 139 samples were tested for aflatoxin. Only ten positives were found; two below 20 ppb, three in the 20-49 ppb range and five in the 50-99 ppb range. 73 samples were tested for fumonisin. Thirty positives were found; five below 5 ppm, thirteen in the 6-10 ppm range, ten in the 21-30 ppm range, one in the 21-30 ppm range and 1 in the 31-60 ppm range.

The Missouri Department of Agriculture is committed to food safety and quality for the protection of our state's consumers. Our mission is to continue to serve, promote, and protect the agriculture producers, processors and consumers of Missouri food, fuel and fiber products.

## 2018 Statistical Summary

Feed Licenses	1,969
Small package pet & specialty pet products	10,218
Formula Feed Sold (Tons)	1,548,987
Feed ingredients sold (tons)	5,184,077
Feed inspections by inspectors *	1,485
Official labeled samples	4,228
Guaranteed claims tested and reported	19,016
Non-guaranteed claims tested and reported	4,519
Withdrawal from Distribution Orders issued	520
Custom mix samples	10
Nutrients tested and reported	56
Service samples	333
Nutrients tested and reported	1,067
TOTAL SAMPLES TESTED	4,584
TOTAL VALUES REPORTED	24,839
TOTAL TESTS PERFORMED	33,444

\* A feed inspection is defined as one inspection for each facility visited where a "notice of inspection" is written indicating the type of regulatory action taken.

## **Excellence in Compliance Award**

The Excellence in Compliance Award is designed to recognize those companies who have high standards and have met or exceeded a 90% rounded average compliance in 2018. Those companies are listed below.

The Missouri Department of Agriculture will issue a certificate to honor those companies that have met or exceeded the following criteria:

- At least five random official regulatory samples must have been taken by a Missouri Feed and Seed inspector and been analyzed by the State Feed Control Laboratory in 2018.
- A 90% passing compliance rate on five or more samples must have been achieved for the 2018 calendar year.
- The company labeling the feed or feed ingredient must be in good standing with the Bureau of Feed, Seed, and Treated Timber, retain a Missouri Commercial Feed License, and have all quarterly inspection fees or yearly product listing (pet and specialty pet foods) paid as required.

A total of 100 feed labelers have achieved a 90% or better compliance rate in Missouri in 2018.

Sixty-eight of these companies maintain an address in the state of Missouri and 33 are located outside of Missouri. A number of companies with out-of-state addresses have manufacturing facilities in Missouri.

## Excellence in Compliance

## SECTION ONE

Section One is intended to show the reliability of labelers in meeting their claims for feed quality. Inspections were planned on a random basis. The greater the number of samples taken per labeler, the greater the probability that the consistency in meeting claims shown will represent how well the labeler met guarantees.

## SECTION TWO

Section 2 lists regulatory actions taken on violations other than failure to meet the guarantees. Violations of the law other than not meeting guarantees include: failure to obtain a Missouri Commercial Feed License, failure to pay inspection fees, negligence in revising the labeling, and failure to label the feed as required by law and as requested by the Missouri Department of Agriculture.

# Statewide Withdrawal from Distribution Orders
