50-70 lbs 100.00-110.00, 70-90  
lbs 90.00-100.00 (per cwt.)

**MISSOURI WEEKLY HAY SUMMARY**

There wasn't much hay baled last week and even less this week. Rains continue to fall and many areas are becoming quite saturated, some farmers in southeast MO have completely given up on planting. Farmers would be very happy to get a break in the weather. If the weather will provide some sun wheat harvest could start in the next couple weeks. The wheat looks good as far as grain, but some doubts about the attractiveness of the straw. First cutting Alfalfa is now at 76 percent complete, 10 percent ahead of last year and 1 percent behind the average. Prices mostly steady. (Prices per ton unless specified). Supreme quality alfalfa 110.00-160.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 80.00-115.00. Good quality large round bales mixed grass hay 15.00-25.00, Good red clover hay 60.00-80.00. Fair quality large round bales Fescue 10.00-25.00 per bale. Wheat hay 50.00-60.00. Wheat straw 1.50-2.25 per small square.

**MIDWEST EGG REVIEW**

Prices on large steady, medium steady, small steady. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .44-.48, Medium .33-.35, Small .12-.16.

**WHOLESALE FEEDSTUFFS PRICES  
(DOLLARS PER TON-BULK BASIS)**

Area	Soybean Meal 48% Solvent	Cottonseed Meal 41% Solvent	Meat Meal	Wheat Middlings

**Weekly Crop Report**

Rain over most of the State last week provided good growing conditions for crops but caused some delays in haying and late crop plantings. The over-all progress of fieldwork compares favorably with recent years. Days suitable for fieldwork during the past week averaged 3.3, ranging from less than 2 days in the northeast and west-central districts to 5 or more days across the southern third of the State. The topsoil moisture supply was reported as 7 percent short, 85 percent adequate and 8 percent surplus. Subsoil moisture is rated as 3 percent very short, 25 percent short, 70 percent adequate and 2 percent surplus. Field Crops Report Ninety-two percent of the corn has emerged, 3 days ahead of last year and similar to normal. Corn condition is reported as 2 percent very poor, 4 percent poor, 29 percent fair, 54 percent good and 11 percent excellent, virtually unchanged from a week earlier. Spraying has been necessary to control cutworms and leaf beetles in some corn fields. Seventy-five percent of the expected soybean acreage has been planted, 5 days ahead of last year and 2 days ahead of the average of 72 percent. Bean planting ranges from 36 percent or less complete in the southwest and south-central districts to 85 percent in the north-central and 94 percent in the northwest. Fifty-two percent of the soybeans have emerged, 3 days ahead of last year but 2 days behind the average of 57 percent. Soybean condition is rated as 1 percent very poor, 4 percent poor, 36 percent fair, 54 percent good and 5 percent excellent. Sorghum is 78 percent planted, 5 days ahead of last year but close to the 5-year average of 79 percent. Winter wheat condition is rated as 6 percent poor, 26 percent fair, 53 percent good and 15 percent excellent, also similar to a week earlier. Seventy-seven percent of the wheat is turning color, slightly later than average, ranging from 25 percent in the northeast district to 98 percent in the southeast. Damp weather has stimulated the development of leaf rust in some areas but no major damage is expected. The wheat harvest has generally not begun, compared with 3 percent last year and 6 percent for the 5-year average. Seventy six percent of the first cutting of alfalfa hay has been cut, several days ahead of last year and nearly equal to normal. The recent rains have improved the outlook for future cuttings. Forty-five percent of other hay is cut, 5 days ahead of a year ago and close to the normal pace.
