SLAUGHTER LAMBS: Ch & Pr  
110-120 lbs; 82.00-84.00, 120-140 lbs 84.00-87.00.

## MISSOURI WEEKLY HAY SUMMARY

Several acres of late grass hay and final cutting alfalfa got wet this week when what looked like a dry week sound up a wet one by Wednesday and Thursday. Other than some movement in the drier areas of southwest Missouri, there was very little interest from buyers again this week. Even the drier areas of the state have had recent rains adding several tons of pasture over the last month. Hay prices this week are steady, with supply moderate to heavy and demand light. The Missouri Department of Agriculture has a hay hotline available, to be listed or for a directory call 1-800-877-HAY(4429) (All prices per ton unless specified and most reflect delivered price) Unless specified prices per ton and reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 80.00-110.00. Prairie hay 65.00-85.00, Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00, Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

## MIDWEST EGG REVIEW

Prices on large steady, medium .01 higher, small .04 higher. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (Cents per dozen) Large .64-.68, Medium .54-.57, Small .31-.35.

## WHOLESALE FEEDSTUFFS PRICES (DOLLARS PER TON-BULK BASIS)

Area	Soybean Meal 48% Solvent	Cottonseed Meal 41% Solvent	Meat Meal	Wheat Middlings

## Weekly Missouri Crop Report

The Missouri corn harvest is progressing at a normal pace while the harvest of soybeans, sorghum and cotton is well behind normal. Abnormally cool weather and heavy dew slowed the drying of row crops in many areas. An average of 5.9 days were suitable for fieldwork. The topsoil moisture supply was reported as 5 percent very short, 13 percent short, 80 percent adequate and 2 percent surplus, with the northwest district indicated as the driest area at 50 percent short or very short. Subsoil moisture is rated at 12 percent very short, 30 percent short and 58 percent adequate. Ninety-seven percent of the corn has reached maturity, slightly behind last year and the 5-year average. Sixty-nine percent of the corn has been harvested, 5 days behind last year but a day ahead of average. Harvesting progress varies from 44 percent complete in the northeast district and 53 percent north-central, to 92 percent west-central and 97 percent in the southeast district. Seventy-six percent of the soybeans are dropping leaves or beyond, 2 days behind average, but the proportion mature at 44 percent is 6 days behind both last year and average as the drying process progressed slowly during the cool weather. More than 50 percent of the beans in the northern third of the State are mature while the southern third ranges from about 13 percent mature in the southwest and south-central districts to 26 percent in the southeast. Condition of the crop is rated as 19 percent very poor, 27 percent poor, 32 percent fair, 18 percent good and 4 percent excellent, virtually unchanged from a week earlier. Thirteen percent of the soybeans are harvested, a week behind both last year and the 5-year average of 25 percent. Progress of the bean harvest ranges from 7 percent or less in the southwest and south-central districts to 20 percent in the northeast. Fourteen percent of the winter wheat acreage for next year's crop has been planted, 2 days behind both last year and the average of 17 percent. Progress ranges from 8 percent or less in the northeast and southwest districts, to 20 percent in the southeast. Wheat is just beginning to emerge, with moisture conditions favorable for giving the crop a good start in most areas.
