crop 100.00-102.00.

**WEEKLY HAY SUMMARY**

Starting to see some hay harvest reaching further north in the state. Still waiting on a good test of new crop hay. High fuel prices and the shortage of high quality hay last year are leading most to think that hay cost could be higher this year. The early crop is looking to have better than average yields for most of the state. Grass hay is about as good as its ever been and cool wet weather helped to slow down the alfalfa weevils which has allowed farmers to have a bit more time for the first cutting with out having to worry about a second spraying. Hay supply is moderate consisting mostly of old crop hay; demand is light and old crop hay prices are steady. The Missouri Department of Agriculture has a hay hotline available for both buyers and sellers. To be listed, or for a directory, call 1-800-877-4HAY(4429). (All prices per ton unless specified and most reflect delivered price) Supreme quality alfalfa (RFV>185) 100.00-140.00, Premium alfalfa (RFV170-180) 80.00-110.00, Fair to Good alfalfa (RFV130-170) Round bales 35.00-70.00, Small and Big squares 70.00-100.00, Fair to good quality prairie hay 60.00-85.00, Good quality brome 50.00-85.00, Good quality timothy hay 3.00-3.50 per small square bale, Good quality red clover hay 30.00-60.00, Good quality mixed grass hay 12.00-25.00 per round bale, Fair quality large round bales fescue 10.00-20.00 per bale. Fair quality large round bales fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square bale.

**MIDWEST EGG REVIEW**

Prices on large .05 lower, medium .09 lower, small .09 lower. IOWA-MINNESOTA-WISCONSIN: Prices paid to producers. (cents per dz.) Large .38-.45, Medium .33-.37, Small .19-.21.

\*This is a *delivered* log report. It *does not* represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:**

- \*\* DIB = diameter inside bark at small end
- \*\*\* MBF = 1,000 board feet
- \*\*\*\* Weighted Average = value of logs at the weighted average board foot price figured at Doyle Scale
- \*\*\*\*\* Logs = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:
  - three sides clear
  - both ends solid
  - determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.
