WEEKLY HAY SUMMARY

Concerns of being dry have faded, at least for now, as many areas in the state have received substantial rain in the past week. Weeds seem to be a huge problem for many crops, pastures look good, and hay fields look good; but farmers are still struggling to get hay baled the way they would like. There seems to be a lot of hay in the state. The only concern at the moment is sellers are having a very difficult time locating any alfalfa that would test high premium to supreme. Demand for this high quality hay has risen sharply, and some sellers even have orders backing up that they can't fill. Asking prices are also rising on top end hay, but so far many buyers aren't coming close to being willing to pay it. Hay prices were steady on beef quality, steady to firm on horse and dairy quality, demand light, and hay supply as a whole is heavy. The Missouri Department of Agriculture has a hay hotline available for both buyers and sellers. To be listed, or for a directory, call 1-800-877-4HAY(4429) (All prices per ton unless specified and most reflect delivered prices) Supreme quality Alfalfa(RFV>185) 100.00-140.00 Premium quality Alfalfa(RFV170-180) 80.00-110.00 Fair to Good quality Alfalfa(RFV130-170) Round bales 35.00-80.00 Small, Big squares and baleage (dry weight) 70.00-100.00 Good quality mixed Alfalfa and grass small square bales 2.50-3.00 per bale 30.00-45.00 per large round bale Fair to good quality Prairie hay 60.00-85.00 Good quality Brome 50.00-85.00 Good quality Timothy Hay 3.00-3.50 per small square bale Good quality Red Clover hay 30.00-60.00 Good quality Mixed Grass hay 20.00-35.00 per round bale 1.25 to 2.50 per small square Fair quality large round bales Fescue 10.00-30.00 per bale Wheat hay 50.00-60.00 Wheat straw 1.50-3.00 per small square bale

WEEKLY FESCUE REPORT

Buying has pretty much ended for fescue seed this year. There is still some seed laying in rows in parts of the state, most too far gone to ever recover. Hard wind and rain knocked out the majority of any seed left standing this past week. Over all it was far from the type of year those in the seed business like to see. There are a limited number of buyers accepting seed, but it takes a few calls to find any. Prices are steady. This will be the last fescue seed report of this year. (Dry: Moisture 12-14% - Wet: Moisture greater than 14%) (Prices per lb.) Southwest, Central, and South Central: .20 wet, .22 dry Northwest: .20 wet, .25 dry Southeast: .21 wet, .21 dry Northeast: .18 wet, .18 dry

Weekly Crop Report

Plentiful moisture and moderate temperatures have helped Missouri crops make good growth in most areas although flood damage can be expected in some of the low-lying fields. An average of 3.8 days were suitable for fieldwork, ranging from about 2.5 days in the west-central and southwest districts to 5 days or more in the east-central and south-central districts. The topsoil moisture supply ratings averaged 6 percent short, 71 percent adequate and 23 percent surplus. The west-central district is the wettest area, with a rating of 56 percent surplus, followed by the northwest and north-central districts with about 33 percent surplus. Subsoil moisture is rated 1 percent very short, 10 percent short, 82 percent adequate and 7 percent surplus. **Field Crops Report:** The corn crop, at 61 percent silked, is the most advanced on record, 8 days ahead of last year. Progress of silking varies from 44 percent in the northeast district to 90 percent in the southeast and south-central districts. Seven percent of the crop has reached the dough stage, also well ahead of normal. Corn condition is reported as 1 percent very poor, 4 percent poor, 16 percent fair, 57 percent good and 22 percent excellent, a minor improvement from a week earlier. Ninety-seven percent of the intended soybean acreage has emerged, 6 days ahead of last year and average. Sixteen percent of the crop is blooming, 10 days ahead of last year and 4 days ahead of the normal pace of 11 percent blooming. Soybean condition is rated as 3 percent very poor, 6 percent poor, 26 percent fair, 54 percent good and 11 percent excellent, nearly the same as a week earlier. Six percent of the sorghum has headed, 2 days behind last year but similar to average. The crop is rated as 3 percent poor, 25 percent fair, 63 percent good and 9 percent excellent, a minor decline from a week ago. Ninety-one percent of the winter wheat is harvested, 3 days ahead of last year and 3 days ahead of normal. Harvesting by area ranges from 81 percent complete in the north-central and west-central districts to virtually complete in the south-central and southeast districts. Fescue seed has been difficult to harvest due to wet weather in some counties, with seed sprouting in the swath.
