Missouri Weekly Hay Summary

Haying is back underway after many producers got to take a break for rains. Although most farmers got rain there are still several small isolated locations that have received no or very little rain. A few Alfalfa producers are just getting started on the second cutting of hay. Early second cuttings appear to be short on quantity just as the first cutting was. Grass hay is being baled every where this year most farmers are covering more area to make a bale but farmers are wanting to put hay up even if its not top end hay its still fair to good and as some have said if it we start feeding early it'll feed. Hay movement is moderate with a few sellers down right swamped trying to get hay delivered; prices are reported as steady to firm supply is moderate. (All prices per ton unless specified) Supreme quality Alfalfa (RFV>185) 115.00-135.00 premium quality Alfalfa (RFV170-180) 90.00-125.00 Fair to Good quality Alfalfa (RFV130-170) Round bales 30.00-80.00 Small, Big squares 70.00-100.00 Good quality mixed Alfalfa and grass small square bales 2.50-3.00 per bale 20.00-50.00 per large round bale Fair to good quality Prairie hay 35.00-60.00 Good quality Brome 40.00-70.00 Fair quality Brome some mixed with grass round bales 10.00-25.00 per bale Good quality Timothy Hay 2.50-3.50 per small square bale Good quality Red Clover hay 25.00-50.00 Good quality Mixed Grass hay 10.00-30.00 per round bale 1.25 to 2.50 per small square Fair quality large round bales Fescue 10.00-25.00 per bale Wheat hay 40.00-60.00 Wheat straw 1.50-3.00 per small bale.

Missouri Regional Fescue Seed Prices – Week ending 06/17/05

Most buying stations are just starting to get a few test loads, many feel that the trucks will really begin to show up this weekend and by this time next week activity should be very busy. The crop looks to be very limited, due to cool temperatures in late April and then prolonged dryness throughout most of May. Moisture on most varieties of seed is testing mid 20's to lower 30's. Prices are firmer than where we ended last season due to the expected lack of crop and very small amount of carry over from last year. One thing that is putting pressure on our prices is the expectations of a good crop in Oregon this year. Even with the pressure most buyers are relaying a stronger undertone to the market once harvest really begins.

(Dry: Moisture 12-14% - Wet Moisture over 14%) (prices per lb.)
South Central, Southeast, Northeast: .28 wet, .30 dry; Central: .26-.28 wet, .28-.30 dry; Southwest: .28-.32 wet, .30-.35 dry; Northwest: .25-.28 wet, .30-.32 dry.

*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

Definitions:

- ** **DIB** = diameter inside bark at small end
 - *** **MBF** = 1,000 board feet
 - **** **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale
 - ***** **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:
 - three sides clear
 - both ends solid
 - determined to be sound and of good quality by buyer
 Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.
- To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.
