Missouri Weekly Hay Summary

Hay farmers continue to have good weather for hay baling. The good old Missouri humidity has shown up so curing is taking a bit longer. Hay cuttings continue to show up short but overall quality is much better than the previous couple years. Quite a bit of new crop straw is showing up in the market as wheat harvest is moving along good. The moisture level is still frustrating farmers as most areas still need more rain on hay fields and pastures. There are just a few in the northwest that have a surplus of moisture. Hay supply and demand is moderate; prices are reported as steady to firm. The Missouri Department of Agriculture has a hay hotline available for buyers and sellers. To be listed, or for a directory, call 1-800-877-4HAY(4429). (All prices per ton unless specified) Supreme quality Alfalfa(RFV>185) 115.00-135.00 premium quality Alfalfa(RFV170-180) 90.00-125.00 Fair to Good quality Alfalfa(RFV130-170) Round bales 30.00-80.00 Small, Big squares 70.00-100.00 Good quality mixed Alfalfa and grass small square bales 2.50-3.00 per bale 20.00-50.00 per large round bale Fair to good quality Prairie hay 35.00-60.00 Good quality Brome 40.00-70.00 Fair quality Brome and mixed with grass round bales 10.00-25.00 per bale Good quality Timothy Hay 2.50-3.50 per small square bale Good quality Red Clover hay 25.00-50.00 Good quality Mixed Grass hay 10.00-30.00 per round bale 1.25-2.50 per small square Fair quality large round bales Fescue 10.00-25.00 per bale Wheat hay 40.00-60.00 Wheat straw 1.50-3.00 per small bale.

Missouri Regional Fescue Seed Prices – Week ending 06/24/05

The fescue seed harvest has turned out to be a huge disappointment this year. That isn't do to a storm resulting in seed loss either. Plain and simple there is no seed to be harvested. Farmers are covering lots of ground to make a hopper full. The general feelings are that the crop is running about a 1/3 of normal. So if you take 70 million lbs average that figures to about 23 million lbs a few positive thinkers are guessing closer to 25-27 million, not a good year for fescue seed farmers or seed dealers. Many buying stations are talking about closing up shop after this weekend, one of the shortest harvests any one can remember. The only exception to this would be a small number of stations in the northern part of the state that might be just a bit later with harvest. Prices are generally about .05 higher than last week.

(Dry: Moisture 12-14% - Wet Moisture over 14%) (prices per lb.)
South Central and Central: .33 wet, .35 dry; Southwest: .33-.38 wet, .35-.40 dry; Northwest: .25-.33 wet, .30-.37 dry; Southeast .34 wet, .36 dry; Northeast .28 wet, .30 dry.

*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

Definitions:

** **DIB** = diameter inside bark at small end

*** **MBF** = 1,000 board feet

**** **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

***** **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

- three sides clear
- both ends solid
- determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including,

but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.
