Missouri Weekly Hay Summary

Several acres of hay cut and baled this week as farmers draw closer to the end of hay making season. Rains would be much welcomed from anyone in the state as several areas are drying out with above average temperatures and pastures have yet to establish much fall growth. Sellers and producers alike are finding themselves some were between a rock and a hard spot battling fuel cost and trying to price what little hay they have on hand. Most buyers are reluctant to pay any more for hay and it is getting close to the point where sellers and producers are not even going to reach a break even point unless something gives a little. Hay demand is moderate, supply is moderate to light. Hay prices are steady this week. The Missouri Department of Agriculture has a hay hotline available for buyers and sellers. To be listed, or for a directory, call 1-800-877-4HAY(4429).(All prices per ton unless specified) Supreme quality Alfalfa(RFV>185) 120.00-145.00 premium quality Alfalfa(RFV170-180) 90.00-125.00 Fair to Good quality Alfalfa(RFV130-170) Round bales 30.00-80.00 Small, Big squares 70.00-100.00 Good quality mixed Alfalfa and grass small square bales 2.50-3.50 per bale 20.00-50.00 per large round bale Fair to good quality Prairie hay 40.00-60.00 Premium Quality Brome large Squares 90.00-100.00 Good quality Brome 40.00-70.00 Fair quality Brome and mixed with grass round bales 10.00-25.00 per bale Good quality Timothy Hay 3.00-4.50 per small square bale Good quality Red Clover hay 25.00-50.00 Good quality Mixed Grass hay 20.00-30.00 per round bale 1.25-2.50 per small square Fair quality large round bales Fescue 10.00-25.00 per bale Wheat hay 40.00-60.00 Wheat straw 2.50-3.50 per small bale.

 *NEW CROP

Weekly Crop Report

Agricultural Summary The Missouri corn harvest is moving ahead on schedule with 14 percent of the crop out of the field. Rain is needed for pastures and stock ponds. Topsoil moisture is rated as 15 percent very short, 31 percent short, 51 percent adequate and 3 percent surplus, a slight decline from a week earlier. Subsoil moisture averaged 15 percent very short, 44 percent short, 39 percent adequate and 2 percent surplus. **Field Crops Report** Ninety-four percent of the corn is dented, a week ahead of last year and normal, while 68 percent is mature, about 5 days ahead of last year and the 5-year average of 58 percent. Condition ratings for the crop are reported as 23 percent very poor, 20 percent poor, 24 percent fair, 27 percent good and 6 percent excellent, similar to a week earlier. Despite an earlier maturing pace, the corn harvest is limited to the average progress for this date of 14 percent complete, due to slow drying of the grain. Some reporters are concerned that corn in the drought areas has weak stalks, making it vulnerable to losses resulting from wind storms. Aflatoxin is showing up in grain from some drought-damaged fields. Soybean development advanced to 29 percent turning color, 1 or 2 days ahead of last year and average, although the 7 percent dropping leaves is slightly behind the 9 percent for both last year and average. Soybean condition is rated as 13 percent very poor, 20 percent poor, 35 percent fair, 27 percent good and 5 percent excellent, a minor improvement from a week ago. Sudden Death Syndrome is showing up in a few bean fields. Eighty-three percent of the sorghum is turning color and 36 percent is mature, a few days ahead of the normal pace. Condition of the crop is rated as 13 percent very poor, 22 percent poor, 40 percent fair, 23 percent good and 2 percent excellent, a slight increase from a week earlier. Five percent of the sorghum is harvested, similar to average. Ninety percent of the third cutting of alfalfa has been cut, comparable to the average for this date **Pasture & Livestock** Pasture condition ratings averaged 27 percent very poor, 32 percent poor, 26 percent fair, 14 percent good and 1 percent excellent similar to a week earlier. Although pastures have made significant improvement since the August rains, more moisture is needed soon to continue the recovery. Stock water supplies are rated at 22 percent very short, 29 percent short, 48 percent adequate and 1 percent surplus, little change from a week ago and leaving many stock ponds still short of water
