**Missouri Weekly Hay Summary**

Temperatures continue to bounce up and down here in Missouri. A strong cold front forecast to pass through, has many in the southwest hoping that this maybe the one to provide a good amount of moisture in any form. Hay movement has been good this week with several truckers adding many miles and burning lots of fuel. Most sales continue to consist of mixed grass type of hay and very few sales of mid to high quality pure Alfalfa. Hay prices this week are mostly steady. The Missouri Department of Agriculture has a hay hotline available for buyers and sellers. \*This is a **delivered** log report. It **does not** represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

**Definitions:**

\*\* **DIB** = diameter inside bark at small end

\*\*\* **MBF** = 1,000 board feet

\*\*\*\* **Weighted Average** = value of logs at the weighted average board foot price figured at Doyle Scale

\*\*\*\*\* **Logs** = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

- three sides clear
- both ends solid
- determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.
