Missouri Weekly Hay Summary

Cooler weather finally arrived this week with the possibility to stay this time. Statewide the hay supply has seen some improvement as fall cuttings helped increase supplies in some areas. The hay supply is now marked at 55 percent adequate. That number is a 13 percent increase over the percent of hay in the adequate and surplus categories at this point last year. Hay movement remains good although grain harvest has slowed movement slightly, not unexpected as seasonal movement tends to follow this pattern. Prices are steady. The Missouri Department of Agriculture has a hay hotline available for both buyers and sellers. To be listed, or for a directory, call 1-800-877-4HAY (4429) (All prices per ton unless specified) Supreme quality Alfalfa(RFV>185) 150.00-180.00 premium quality Alfalfa(RFV170-180) 140.00-175.00 Fair to Good quality Alfalfa (RFV130-170) Round bales 80.00-140.00 Small, Big squares 90.00-160.00 Good quality mixed Alfalfa and grass small square bales 3.00-6.50 per bale, 40.00-75.00 per large round bale, Good to Premium quality Prairie hay small squares 80.00-125.00, Fair to good quality Prairie hay 50.00-75.00, Premium Quality Brome large Squares 80.00-130.00 Good quality Brome 70.00-120.00 Fair quality Brome and mixed with grass round bales 35.00-50.00. Good quality Timothy Hay 3.00-4.50 per small square bale, Good quality Mixed Grass hay 30.00-60.00 per round bale. Fair to good quality bluestem 40.00 per round bale, Fair to good quality Bermuda grass 65.00 per round bale, Wheat hay 50.00-70.00, Wheat straw 1.75-3.50 per small bale.

Weekly Crop Report

Farmers again made steady progress during the week with the row crop harvest and wheat planting. Light to moderate rain fell in nearly every county, but abnormally warm weather quickly dried soils enough to limit harvest downtime. The moisture and warmth promoted pasture growth in many areas, while also providing good conditions for wheat germination. Topsoil moisture rates 24 percent very short, 36 percent short, 38 percent adequate, and 2 percent surplus. There was general improvement in topsoil moisture among the western districts, while the southeast deteriorated. Subsoil moisture rates 22 percent very short, 40 percent short, and 38 percent adequate. There were 5.8 days suitable for fieldwork. Corn harvest is 81 percent complete, nearly even with last year and 6 days ahead of the 5-year average of 76 percent. Ninety-four percent of the soybean crop is turning color, about 5 days behind last year and normal. Eighty-one percent is dropping leaves, 3 days behind last year and 2 days behind normal. Sixty-six percent is mature, 1 point behind last year at this time but slightly ahead of average. Harvest is 31 percent complete, marginally behind last year but about 1 day ahead of the 5-year average of 28 percent. Yield reports are highly variable even within counties. Soybean condition is rated 10 percent very poor, 19 percent poor, 34 percent fair, 30 percent good, and 7 percent excellent. Eighty-two percent of the sorghum crop has reached maturity, 8 days behind last year and 6 days behind normal. Harvest is 46 percent complete, 8 days behind last year and 1 week behind normal. Sorghum condition is rated 3 percent very poor, 9 percent poor, 46 percent fair, 38 percent good, and 4 percent excellent. Winter wheat is 19 percent planted, 3 days behind last year and about 1 day behind normal. Emergence is at 6 percent, the same as average. Pasture condition is rated 28 percent very poor, 22 percent poor, 32 percent fair, 17 percent good, and 1 percent excellent, nearly the same as last week. Hay supply is estimated as 13 percent very short, 28 percent short, 55 percent adequate, and 4 percent surplus, 13 percentage points better than last year at this time in the adequate and surplus categories. Stock water supply is rated 8 percent very short, 22 percent short, 69 percent adequate, and 1 percent surplus, 27 points better than last year in adequate and surplus.
