Missouri Weekly Hay Summary

Moisture is keeping most hay equipment parked another week. Some farmers are managing to get silage cut however and in a few areas some early corn even coming out of the fields. Hay movement remains quite slow as many farmers once again watching fuel prices drop hoping for a cheaper final hay bill. Pasture conditions have also contributed to slow hay movement as fall supplementing has not been an issue this year. Prices on hay remain steady to firm; the supply moderate to heavy and demand is light to moderate.
