Missouri Weekly Hay Summary- Week ending 07/09/10

Cooler weather settled over the state this week which not the usual for Fourth of July celebrations. Much of the north got more rains just as waters were starting to subside. Despite all the standing water the hill tops and pastures in isolated areas welcomed the moisture. After missing so much of the surplus water the north half of the state has received all growing season many parts of the south finally saw some moisture which they were most thankful for as areas were becoming very dry. Very little haying was done this week as forecast showed fair to likely chances of showers nearly every day. The supply of hay is moderate, demand moderate, and prices steady. (All prices f.o.b. and per ton unless specified Premium to Supreme quality Alfalfa 140.00-185.00 Fair to Good quality Alfalfa large round bales 75.00-140.00 Small, Large squares 90.00-150.00 Good quality mixed Alfalfa and grass small square bales 3.50-5.00 per bale; 30.00-60.00 per large round bale. Good to Premium quality Brome 90.00-150.00; Good quality Brome 50.00-120.00 Fair quality Brome some mixed with grass 30.00-50.00 per large round bale Good to Premium Mixed Grass hay 60.00-120.00 Good quality Mixed Grass hay 40.00-80.00 Fair to Good quality Mixed Grass hay 15.00-40.00 per large round bale Wheat straw 2.00-4.00 per small square bale **Crop Progress and Condition 07/04/10** Hot, dry conditions during the week have been very good for fieldwork and haying; however, many producers are seeing the need for a good, soaking rain. A lack of precipitation over the last 4 weeks deteriorated non-irrigated crops and pastures, and depleted stock water supplies in the south-central and south-east districts. There were 6.2 **days suitable for fieldwork**. **Topsoil moisture** was rated 15 percent very short, 26 percent short, 48 percent adequate and 11 percent surplus, much drier than a week earlier. The northern third showed the biggest change in surplus topsoil moisture dropping at least 27 points in each district. **Subsoil moisture** was rated 8 percent very short, 18 percent short, 67 percent adequate, and 7 percent surplus. **Field Crops Report: Corn** silked and beyond was 45 percent complete, a week ahead of last year and 2 days ahead of the 5-year average (normal). Corn condition was rated 5 percent very poor, 17 percent poor, 31 percent fair, 37 percent good, and 10 percent excellent, a slight improvement from a week earlier. **Soybean** planting was virtually complete across the State. Eighty-nine percent of the soybean acreage has emerged, 2 days ahead of last year, but a day behind normal. Soybean condition was rated 5 percent very poor, 14 percent poor, 37 percent fair, 37 percent good, and 7 percent excellent, similar to last week. **Winter wheat** harvest jumped 29 points to 93 percent complete, 6 days ahead of last year and a week ahead of normal. Some producers in the northern third of the State reported a low test weight due to the very wet conditions.
