Missouri Weekly Hay Summary Week ending 01/10/2013

For the first time in several weeks Missouri has seen some increased activity in the hay market. Grass hay continues to be imported from the Southeastern United States, however some lower quality hay has now been traded on a local level. Straw is in great supply locally and in the regional hay markets as well and is met with little demand. Some news outlets are reporting nitrogen based fertilizers seeing an increased price of as much as 8 percent, with potassium based a decrease of as much as 9 percent. Supply is light, demand is moderate, and prices are uneven. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> or for current listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales prices listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
