Missouri Weekly Hay Summary Week ending 04/04/2014

March may have a reputation for lion-weather, but April is already roaring too. Temperatures have varied greatly across the state, but severe weather has already had an impact with more to come. Some cattlemen, who raise only enough hay for themselves, have gotten closer to the bottom of the stack as grass has been slow to develop. A few warm, sunny days will likely get pastures back on pace with producers expectations. A small amount of corn is rumored to be in the ground, and the next run of dry days will likely see a great many acres planted. Hay demand is light to moderate, supply is moderate to heavy and the prices are steady. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> or for current listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales price listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
