Missouri Weekly Hay Summary

Spring has seemed to sprung over the last week. Snow has now melted and caused some serious run off as the ground is still frozen just below the slimy slick surface. Hay movement has picked up over the last two weeks with several loads heading to the southern areas of the state and beyond. Heavy extended snow cover really ate up the feed supply. This is not to say there is any shortage of hay, several farmers still have ample supplies but lack of activity for the feeding season so far has made the slight shift in demand and increased movement quite noticeable. The supply of hay is mostly moderate and demand is light to moderate. Prices are steady. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> or for current listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales price listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
