Missouri Weekly Hay Summary

Green is the color of Spring and green up is well underway around the state. Feeding requirements will decrease quickly as cattle chase early sprigs of grass and other less desirable plants that just look like they may be tasty. . Although there has been several warm days the last couple weeks, temperatures dropped this week and the threat of frost or a touch of winter weather is present for the next few days. Early spring is known to be unstable and the first severe storms of the year came alive this week. The focus of many farmers has now shifted to this year's crop. Fields and pastures are wet but many are preparing to apply fertilizer and also keeping eyes on Alfalfa fields to begin spraying once the need arises. The supply of hay is moderate and demand is light. Prices are steady. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> or for current listings of hay visit <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales price listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
