**Missouri Weekly Hay Summary (12/17/15)**

The state saw another week of warm weather although more seasonable temperatures are expected towards the end of the week. Heavy rains once again fell and caused flooding in some areas. The Grand River for example in North Central MO rose to 11 feet over flood stage according USGS. Mud

has been a big headache as a result of all the moisture and warm temperatures. Not only has travel in the country and on farms been troublesome but many cattle are also having a hard time as well. Foot and respiratory issues have become more common than anyone would like and warm wet weather just does not bode well for adding weight to cattle. Hay movement remains quite slow although a few producers have mentioned an uptick in inquires it seems most are only window shopping prior to Christmas however. The supply of hay is heavy, demand is light and prices are steady. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> for for current listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales price listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
