Missouri Weekly Hay Summary - Week ending 12/08/2017

Over all total area of the state showing on the drought monitor is about even with last week with near 75 percent of the state in some stage of drought. The severity of dryness continues to worsen each week however with the severe category now reported at near 24 percent. There was a cold front that brought some rain and even the year's first snowflakes to some parts of the state but neither was enough to provide any helpful moisture. The front did bring below average freezing temperatures with wind chills in the single digits. Feeding is increasing each day now although several in the driest parts of the state have been feeding a while already. Hay movement is slow, supplies are moderate, demand is light and prices are steady. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales price listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
