Weekly Hay Summary
Winter weather put a wrench in the hay trucking this week. Some sellers did still manage to move good amounts of hay a couple days waiting for roads to clear. The phones continue to ring but most hay seems to be going away from the state. Locally many barns and hay piles remain well above normal levels for being so far into the feeding season. The problem that sellers seem to be having is no matter how long the hay ages in the barns the quality doesn't seem to improve. That could be a good thing however as one of the biggest factors allowing prices to hold near steady is the short supply of high quality hay. Prices are mostly steady. Supply and demand are moderate. The Missouri Department of Agriculture has a hay hotline available for both buyers and sellers. To be listed or for a directory call 1-800-877-HAY (4429) All prices per ton unless specified and most reflect delivered price. Supreme quality alfalfa 110.00-140.00. Premium quality alfalfa 105.00-110.00. Prairie hay 65.00-85.00. Good quality brome hay 60.00-100.00. Good quality timothy hay 3.00-3.50 per small square. Good large round bales mixed grass hay 15.00-25.00. Good red clover hay 50.00-75.00. Fair quality large round bales Fescue 10.00-20.00 per bale. Wheat straw 1.50-2.50 per small square.

*This is a delivered log report. It does not represent or imply prices paid for standing timber on your land. Values of standing timber can vary significantly from delivered due to the following: proximity to solid roads and saw mills, size of offering and proximity to other offerings, land terrain, prevailing conditions, quality, size, density, and species of timber.

Definitions:

** DIB = diameter inside bark at small end
*** MBF = 1,000 board feet
**** Weighted Average = value of logs at the weighted average board foot price figured at Doyle Scale
***** Logs = The prices in this report are for logs that are classified as U.S. Forestry grade one logs and more specifically described by the DIB and length in the report, as well as by:

• three sides clear • both ends solid • determined to be sound and of good quality by buyer

Buyers use many criteria to determine the soundness and quality of a log, including, but not limited to: ring size, frost cracks, sweep, stain, back thickness, scars, crook, and color.

To realize the most from the sale of timber, it is recommended to seek the advice of a professional forester. For more information call 1-800-328-1165.
