Missouri Weekly Hay Summary

Although weather forecasters said we had a close call, it now seems that it will at least be after Thanksgiving before snow falls. Although some are and have been feeding hay for a while the longer that old man winter waits to turn the freezer to high the better this year, as finding hay gets more difficult each day and a long feeding season is definitely not desired with the light hay supply this year. The market has pretty much reached a steady point until the snow falls. The supply of hay is moderate to light, demand is moderate to high, and prices mostly steady. The Missouri Department of Agriculture has a hay hotline available for buyers and sellers. To be listed, or for a directory, call 1-800-877-4HAY (4429). (All prices per ton unless specified) Superior quality Alfalfa (RFV = 185) 135.00–160.00 per ton; premium quality Alfalfa (RFV = 170–180) 100.00–125.00 per ton. Fair to Good quality Alfalfa (RFV = 130–170) Round bales 40.00–50.00 Small, Big squares 70.00–110.00. Good quality mixed Alfalfa and grass small squares 3.00–4.50 per bale, 30.00–60.00 per large round bale Good to Premium quality Prairie hay small squares 80.00–100.00, Fair to good quality Prairie hay 40.00–70.00, Premium Quality Brome large Squares 90.00–100.00. Good quality Brome and mixed with grass round bales 20.00–40.00. Good quality Timothy Hay 3.00–4.50 per small square bale, Good quality Mixed Grass hay 25.00–45.00 per round bale Fair quality large round bales Fescue 15.00–30.00 per bale Wheat Hay 50.00–70.00. Wheat straw 1.75–3.00 per small bale. Corn stalks 20.00 per large round bale.

*NEW CROP

Weekly Crop Report

Row crop harvesting moved ahead moderately in some areas of the State but progress in the southeastern district was again restricted by wet weather. Topsoil moisture supply is rated 15 percent very short, 28 percent short, 49 percent adequate, and 8 percent surplus. Farmers in many areas of the State continue to be concerned about soil moisture for next years crops and pastures, as well as the immediate need of more run-off for stock ponds. Counties reporting excessive moisture are mainly in the southeast district where the surplus rating averages 66 percent. Field Crops Report: Corn harvest is 97 percent complete, equal to last year but still slightly ahead of the 5-year average of 95 percent. Good progress was made in the northwest district where harvest moved to 91 percent complete but the area remains well behind the near-completion rate of the rest of the State. Soybean harvest advanced 3 points over last week to 88 percent complete, 8 days behind last year and 1 day behind normal. Bean harvesting is least advanced in the south-central and southeast districts, at 53 and 76 percent respectively, while all other districts range from 87 to 94 percent complete. More wet weather in the Bootheel has continued to delay soybean and cotton harvesting in that area. The cotton harvest is 71 percent complete, over 3 weeks behind last year and 2 weeks behind the 5-year average of 85 percent. Ninety-seven percent of the sorghum crop is harvested, 3 days ahead of last year and over a week ahead of average. Winter wheat seeding is 89 percent complete, 8 days behind last year but 1 day ahead of average. Planting progress ranges from 80 percent complete in the southeast district and 85 percent in the west-central, to 91 percent or more in all other districts. Wheat emergence of 71 percent is 5 days behind last year but similar to the 70 percent normal. Condition of the crop is rated 1 percent very poor, 11 percent poor, 42 percent fair, 45 percent good, and 1 percent excellent, a minor decline from last week. Pasture & Livestock: Pasture condition is reported at 33 percent very poor, 21 percent poor, 27 percent fair, 18 percent good, and 1 percent excellent, a slight improvement from the previous week but still mostly poor or very poor in the northeast, west-central, central and southwest districts. Hay prices remain high due to limited pasture feed and hay shortages in many counties.
