Missouri Weekly Hay Summary

After being extremely dry the past few years, this week finds much of Southwest Missouri flooded. Other areas had to wait out and work around normal summer showers to try to get more hay baled. Hay movement remains slow as most every area in the state has plenty of grass for the time being. Supply is moderate, demand is light and prices are steady. The Missouri Department of Agriculture has a hay hotline available for buyers and sellers. To be listed, or for a directory, call 1-800-877-4HAY(4429).(All prices per ton unless specified) Supreme quality Alfalfa(RFV>185) 150.00-180.00 premium quality Alfalfa(RFV170-180) 140.00-175.00 Fair to Good quality Alfalfa (RFV130-170) Round bales 80.00-140.00 Small, Big squares 90.00-160.00 Good quality mixed Alfalfa and grass small square bales 3.00-6.50 per bale, 40.00-75.00 per large round bale, Good to Premium quality Prairie hay small squares 80.00-125.00, Fair to good quality Prairie hay 50.00-75.00, Premium Quality Brome large Squares 80.00-130.00 Good quality Brome 70.00-120.00 Fair quality Brome and mixed with grass round bales 35.00-50.00. Good quality Timothy Hay 3.00-4.50 per small square bale, Good quality Mixed Grass hay 30.00-60.00 per round bale. Fair to good quality bluestem 40.00 per round bale, Fair to good quality millet/sudan grass round bale 50.00-55.00, Fair to good quality Bermuda grass 65.00 per round bale Wheat hay 50.00-70.00, Wheat straw 1.75-3.50 per small bale.

Weekly Crop Report

Soaking rains fell nearly statewide, providing excellent conditions for early corn in the silking and pollination stages. However, excessive rain in especially the west-central and southwest districts caused low-land flooding, state and county road closures, and significant delays to the wheat harvest, which, in turn, set back double-crop soybean planting. Reporters indicate significant wheat acreage could be lost in some counties. Rainfall totals as high as 17 inches were reported. Topsoil moisture rates 3 percent very short, 15 percent short, 61 percent adequate, and 21 percent surplus. The far northwestern section of the state missed most of the rain, causing a moderate decline in topsoil moisture supply in that district. However, the northwest has mostly adequate subsoil moisture, as does most of the state. State-level subsoil moisture rates 3 percent very short, 16 percent short, 73 percent adequate, and 8 percent surplus. There were 3.7 days suitable for fieldwork. The corn crop is 44 percent silked, nearly even with last year and 3 days ahead of the 5-year average of 37 percent. Moderate temperatures and adequate soil moisture have resulted in very few reports of stress as the bulk of the crop enters pollination. Condition of the crop rates 3 percent very poor, 5 percent poor, 27 percent fair, 49 percent good, and 16 percent excellent. Ninety-five percent of the soybean crop is planted, while 90 percent is emerged. Producers in west-central and southwestern areas are still waiting to plant double-crop soybeans, but reporters are expecting the wait will get too long, resulting in substantial reductions in double-crop acres from normal levels. Soybean blooming is at 8 percent, nearly even with the 5 year average of 9 percent. Condition is rated 3 percent very poor, 6 percent poor, 34 percent fair, 49 percent good, and 8 percent excellent. Wheat harvest is 67 percent complete, 12 days behind last year and 5 days behind normal. Harvest has been seriously hampered in areas that received heavy rains. The west-central district is 42 percent harvested compared to 97 percent last year, while the southwest is at 21 percent compared to 92 percent last year. Standing water has many fields severely lodged, heads turning gray, and grain sprouting in the heads. The second alfalfa cutting is 35 percent harvested, 11 days behind last year and 1 week behind normal. Other hay is 78 percent cut, 1 week behind last year.
