Weekly Crop Report

Minimal progress was made in the corn harvest, as farmers in northern districts shifted combines into fields of mature soybeans. Central and southern areas also made good progress with soybean harvest. Fall fertilizer application and tillage became more widespread, with fall tillage 20 percent complete for the state. Wheat planting advanced substantially in all areas. However, rain put a halt to activities late in the week. Corn harvest is 83 percent complete, an advance of only 2 points from last week. Harvest is running about 1 week behind last year but slightly ahead of normal. Ninety-two percent of the soybean crop is dropping leaves, with 78 percent mature. Harvest progressed 16 points to 47 percent complete, 2 days behind last year but slightly ahead of the 5-year average of 45 percent. Yields are running near normal to above average in many areas, although reports in the north-east indicate very poor yields in the driest areas, with a few fields too poor to even harvest. Soybean condition is rated 11 percent very poor, 18 percent poor, 34 percent fair, 30 percent good, and 7 percent excellent. Winter wheat is 41 percent planted compared with 19 percent last week and 40 percent as the 5-year average.
