**Missouri Weekly Hay Summary**

Week ending 04/08/2010

Hay acres harvested is expected to see about a 6% increase over last year for a total of 4.10 million acres. Much of that is expected to be grass type hay as there wasn't that large of an increase in last fall alfalfa planting numbers. Farmers are still spreading fertilizer, and with the warm temperatures should keep an eye out for weevils. Wet soils have prevented nearly all corn planting so far this spring, although some areas are now starting to get some ground covered and anhydrous cut in. Still far too early to get overly excited about that fact however, due to the speed that farmers are able to cover acres once conditions do become right. The supply of hay is light, demand moderate, and prices steady. Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory, visit, <http://mda.mo.gov/abd/hay> directory (All prices f.o.b. and per ton unless specified and on most recent reported sales prices listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs) Supreme quality Alfalfa (RFV>185) 150.00-185.00. Premium quality Alfalfa (RFV170-180) 140.00-175.00.
