Missouri Weekly Hay Summary Week ending 01/20/12

Last week USDA released the December 1st estimates of hay stocks. Nationally stocks are at the lowest levels since 1988. In Missouri hay stocks are estimated at 5.45 million tons which is more than 1 million tons lower than one year ago. It is assumed that many of those on-farm stocks are for on-farm use or are already sold and awaiting a future delivery date. Even if some hay remains available supplies look to become very tight before 2012 haying begins. Hay prices are steady. Demand is moderate and supply is light. Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory, visit <http://mda.mo.gov/abd/haydirectory/> or for current listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales prices listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs)
