Missouri Weekly Hay Summary Week ending 02/01/2013

With temperatures this week both unseasonably warm and bitterly cold the best part of every forecast was the precipitation. Most areas in the state got a measurable rain (some topping two inches) and some got added snow as well. While hay supplies are light to moderate large lots of hay are not widely available and it may take several calls to piece together a large order. Full loads, or multiple load orders, are still mostly coming from the Southeastern United States. Demand is moderate for all hay types, with dairymen the only ones actively seeking to meet their needs. Prices are steady. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> or for current listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales prices listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
