MISSOURI WEEKLY HAY SUMMARY 12/23/21

A fairly quite week compared to the previous few around the state. Much of the southern 1/3 of the state did receive a few inches of rain late last week which was quite welcome. Temperatures have fallen to more normal levels although a fairly nice warm up is expected just in time for Christmas. Feeding continues to be minimal but stock piles of grass are quickly fading if they aren't already gone so hay feeding will only increase. Hay movement has been slow mostly sales of small qualities of small bales to equine interest as most beef farmers have plenty of round bales stacked around for feeding. The supply of hay is moderate and demand is light to moderate and prices mostly steady. The Missouri Department of Agriculture has a hay directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/>
