**Missouri Weekly Cattle Auction Summary 04/11/22**

Receipts: 27,143 Week ago: 24,360 Year ago: 29,508

Compared to last week, feeders sold steady to 3.00 lower. The supply of feeders was moderate, although reporters in several locations noted overall quality was lower than has been seen in the previous weeks and offerings were made up of many more unweaned new crop type of calves carrying a bit more flesh than what buyers of grass cattle prefer. Demand was moderate but again discounts are being applied to those cattle that won't go to grass and take to gaining in a hurry. Weather continues to be a rollercoaster as the season's transition. Some areas saw some light snow last week along with heavy frost and freezing temperatures that were followed up by a big warm up that got into the 80's over the weekend. Thus far there has been very little field work done this spring a few days here and there has allowed limited tillage or but planting hasn't been enough be measured thus far. Boxed beef cutouts were mixed for the week with choice closing on Friday at 270.47, up 3.33 and select at 260.33, down 2.19 compared to last week. As of Friday afternoon negotiated feedlot volume for the week was just over 95K head. Most of the trade occurred on Monday and Tuesday this past week. Live sales were reported from 137.00-140.00 and dressed sales mostly at 222.00. If realized livestock slaughter for the week, 676,000, will be the 3rd largest week since 2011. Both of the top two largest weeks occurred in the fourth quarter of 2021. The Missouri Stocker Formula consist of 4816 head with a weighted average weight of 529.70 lbs. and a price value of 189.97, 1.98 lower than last week. The steer heifer spread is currently 29.90. Supply included: 76% Feeder Cattle (50% Steers, 0% Dairy Steers, 45% Heifers, 4% Bulls); 15% Slaughter Cattle (1% Steers, 1% Heifers, 88% Cows, 11% Bulls); 9% Replacement Cattle (13% Stock Cows, 43% Bred Cows, 3% Bred Heifers, 30% Cow-Calf Pairs, 10% Heifer Pairs, 1% Bulls). Feeder cattle supply over 600 lbs was 45%.

**MISSOURI WEEKLY HAY SUMMARY 04/07/22**

Springtime instability persisted this week. Several farmers got to spread some fertilizer a couple of days between rains. Winds blew hard a few days which should help to dry out the top soil. There was one report of some early corn sprouting far south in the boothill but that is by far an exception as planters have been setting as most fields are still way to muddy to work. Cooler than average temperatures on Thursday had everyone searching for jackets again. Hay feeding continues to wind down as cattle are chasing grass now. Hay supplies are moderate, demand is light to moderate and hay prices mostly steady. The Missouri Department of Agriculture has a hay directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/>
