All dogs are measured from the tip of the nose to the base of the tail while the dog is in a normal standing position.

Covered dogs may be exempted from 2016 space requirements for the purpose of documented veterinary treatment. Female dogs may be exempted when they are within two weeks of their whelping date and eight weeks post parturition. In these instances, the USDA space formula still applies.

To meet 2016 requirements, no more than six (6) adult dogs may be housed in the same primary enclosure.
